West Suffolk Hip Service

Information for Patients
diagnosed with Hip Osteoarthritis

THE BEST OF HEALTH FOR WEST SUFFOLK

You have been referred to the West Suffolk Hip Service – what happens now?

The West Suffolk Hip Service is operated by physiotherapists and is designed specifically for people with osteoarthritis of their hip.

The aims of the service are:

To work with you to help you to manage your hip condition, to decrease any pain you may have and to improve your day to day functioning.

To educate and inform you about arthritis, total hip replacement surgery, pain management, exercise, weight management and the benefit of using aids of daily living.

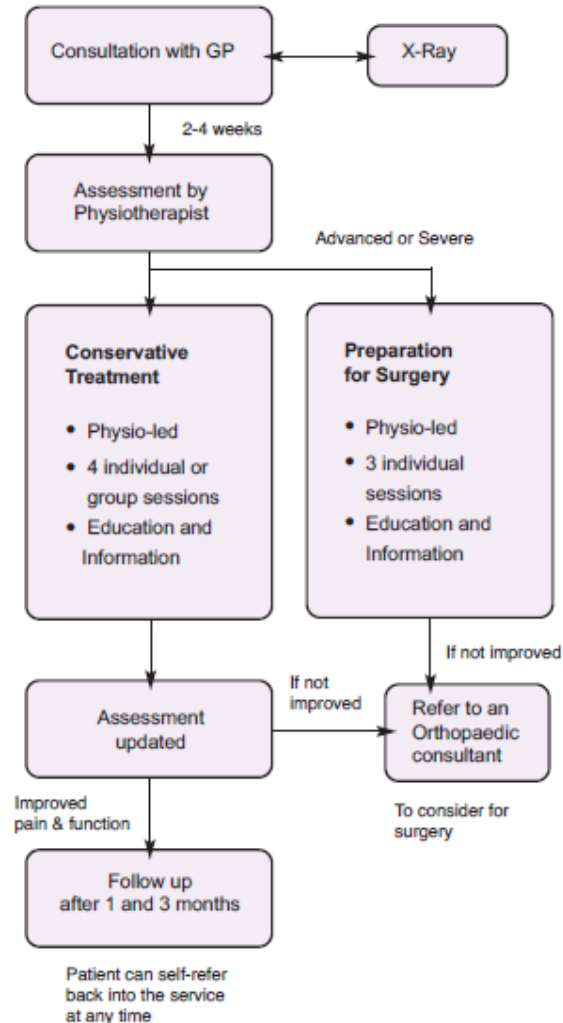

To support you in making an informed decision about the treatment options for your hip.

To ensure that you are fully prepared to manage your hip condition, whether or not you decide to consider hip replacement surgery.

The service offers group sessions to deliver education and a personal exercise programme aimed at improving your strength, flexibility, mobility and function.

Once you have seen us, and been through the programme you will be asked to complete a brief questionnaire to let us know how the programme was and any benefit you have found, and suggestions for how we could improve our service.

The Hip Assessment Pathway

Frequently Asked Questions

What is the West Suffolk Hip Service?

The service is designed to help patients to manage their hip pain through group and individual physiotherapy sessions. Many patients will be able to manage their pain without the need for surgery, but the service also helps patients who do require a hip replacement to prepare for surgery and make sure they are fit and ready to get the best possible outcome.

What if attending group sessions is difficult for me?

You may be offered individual sessions. These will cover the same material as the groups but will be tailored to your specific requirements.

Will being referred to the West Suffolk Hip Service delay my assessment by a surgeon if I need a hip replacement?

No. The service will assess you within 2-4 weeks and, if you require surgery as a treatment option, you will be referred directly to an Orthopaedic Consultant.

Do I have a choice where to have surgery?

We can refer you to Orthopaedic Consultants for consideration of a Total Hip Replacement at a location of your choice.

What happens if my hip pain flares back up after I have completed the programme?

You can refer yourself back into the West Suffolk Hip Service at any time.

Will exercise cause me harm?

The exercises delivered by the West Suffolk Hip Service are designed to help to build muscle strength and endurance and can lead to reduced pain and improved joint function.
